

Job Description

Full Stack Developer - Junior Developers

Experience	2–5 years (min. 2)
Location / Mode	Chennai - Hybrid
Employment Type	Full-Time
Reports To	Tech Lead / Senior Developer
Domain	Insurance — Nice to have
Notice Period	Immediate–30 days

Role Summary

A hands-on developer who builds full-stack features under the guidance of senior team members. The focus is on writing clean, well-tested code, learning quickly, and growing technically — not on customer ownership or team leadership.

Key Responsibilities

- Develop, test, and maintain full-stack features under the guidance of senior developers and the Tech Lead.
- Write clean, maintainable code with appropriate unit tests.
- Participate in requirement and design discussions to understand the work and grow.
- Fix defects, address code-review feedback, and contribute to documentation.
- Collaborate within the team and continuously build technical depth.

Must-Have — Technical

- Hands-on working knowledge of the stack: Java, Spring Boot, Node.js, TypeScript, and React.js or Angular (front-end + back-end).
- Fundamentals of OOP, REST APIs, version control (Git), and databases.
- Working exposure to AI implementation: Python with basic hands-on use of AI tools and LLMs / SLMs.
- Working exposure to microservices, CI/CD, Docker, and Kubernetes.

Must-Have — Experience & Soft Skills

- B.Tech / B.E. or an equivalent Bachelor's degree in Computer Science / Engineering (or a related field) from a reputed academic institution.
- 2–5 years of hands-on development experience.
- Good communication skills; eager to learn and a good team player.

Nice to Have

- Any valid technical certification adds value.
- Exposure to the insurance domain.
